Java

SQL

Hobbies

I love to develop and create my own projects as simple as they can be. By the moment I don't have much experience because I like to toy and discover new technologies to see their pros/cons and the possibilities they can offer to create my future projects.

English

Spanish

Profile

I am a 22-year-old with a desire to learn about programming and its many aspects. I like challenges and I believe that in this field you can never stop learning and growing as a professional. I would like to start with my first job opportunity to be able to see and understand first hand how companies work in their different environments.

Education

CFGM SMIR, Institut de l'Ebre, Tortosa

September 2019 — July 2021

In the first year of this course I learned the basic concepts of computing and networks. I learned to work with and manage different operating systems (with and without GUI). For the final project in terms of programming, I made a very basic remake of Google Maps with html/css/javascript and FireBase that consisted of a system of coordinates and pointers to save locations of interest. For the final systems project I made a working domain simulating the structure and management of the different devices in a hospital (Windows server and ubuntu server with different configured services (DMZ, DHCP, DNS, CUPS, etc...)).

CFGs DAM, Institut de l'ebre, Tortosa

September 2022 — Present

In this Degree I am learning a lot about the development of multi-platform applications with Java and SQL as well as expanding my knowledge about OOP and different development environments. I am currently looking for an internship or full-time contract to complete/validate my FCT or FP Dual internship hours.

Internships

Gestor de contenido Web, Fàbregues Motosports S.L, Tortosa

January 2021 — May 2021

- I planned and implemented new front-end content for the company's store website. In addition to modifying and updating outdated content on products by adding or modifying html/css code.

Courses

Data Science (Big Data)(300h), Indice Online

March 2021 — June 2021
